

## SUMMARY

Motivated computer science student with an academic background seeking an internship. Proficient in programming, software development, and tech problem-solving. Quick learner, excellent communicator, and eager to contribute to innovative projects. Enthusiastic about emerging technologies, offering a proactive approach to add value to a dynamic tech-focused team.

## EDUCATION

### Central University of Haryana

Bachelor's degree in technology (B.Tech)  
In Computer science and Technology  
2020 - 2024

### Pusa Institute of Technology

Diploma in Printing Technology  
2017 - 2020

## SKILLS

- C++(Programming Language)
- Python/ML
- Git/GitHub
- MySQL
- HTML/CSS
- JavaScript/jQuery
- Linux
- Ability to work independently and as part of a team

## CERTIFICATIONS

- I had submitted the project, they given me a certificate on Technophilia Solution website. To complete the Web development course.
- Maruti Suzuki India limited (MSIL), I have successfully concluded my internship, and in recognition of my achievements, I have been granted a certificate.

## PROFESSIONAL EXPERIENCE

### Intern

Maruti Suzuki India Limited India (MSIL) | Jun - Jul, 2023

- Manage Big Data
- Data Collection, Data Cleaning, Data Visualization

## PROJECT

### Face-Expression-Recognition

- Developed a Python-based minor project utilizing various machine learning libraries to achieve a facial expression recognition model.
- Achieved an impressive model accuracy of 92.74%, showcasing strong proficiency in implementing machine learning algorithms.
- Leveraged Python and ML expertise to contribute to the project's success, highlighting programming skills and practical application of machine learning concepts.

### Inscription

- Spearheaded the end-to-end design and development of a responsive and visually appealing website (<https://adarsh9077.github.io/Inscription/>) using HTML and CSS, showcasing proficiency in front-end technologies.
- Successfully delivered a self-developed project, underscoring the ability to take ownership of design projects, meet deadlines, and contribute independently to the creation of engaging online experiences.
